President's Message

Submitted by Desmond Kelly, MD

We have entered our 30th year as a professional society and we have many accomplishments to celebrate but much work to do. The Society for Developmental and Behavioral Pediatrics is well-established and highly regarded due to the efforts of our early leaders and dynamic membership. We are energetically fulfilling our mission as "an interdisciplinary professional organization that promotes the developmental and behavioral health of all infants, children, adolescents and their families by advancing research, education, evidence-based clinical practice and advocacy."

Our Journal is thriving with 9 annual issues of original articles, reviews and special articles and the Developmental-Behavioral Pediatrics Research Network has been established to foster scientific study in our field. We are ending our first decade as a Board-certified pediatric subspecialty and there are a growing number of ACGME accredited Fellowship training programs that are participating in the National Residency Match Program. Psychologists and their trainees fill many leadership roles in the Society and members of other disciplines are cementing their identity through special interest groups and other activities. Our Annual Meeting has become a "must-attend" and is bursting at the seams with opportunities for education and networking. We have established a prominent role at the Pediatric Academic Societies meeting each year and our website is a gold mine of information. Our Practice Issues Committee is leading efforts to establish benchmarks of care and mechanisms to secure reimbursement for subspecialty developmental and behavioral services. Our international reach is expanding and advocacy efforts continue on many fronts. Those of you who were fortunate enough to attend our highly successful 2011 Annual Meeting in San Antonio experienced the sense of energy and enthusiasm that pervades SDBP.

Yet, this is no time to rest on our laurels. In economically stressed times with major changes in the health care system already in motion, we have to move swiftly and wisely to secure our future. There are many threats to our ability to continue to provide the services that our patients and their families so critically need. Each week seems to bring new challenges to our systems of reimbursement. Research funding is tight and there is fierce competition for support through foundations and other philanthropic resources. There are not as many qualified applicants for our fellowship programs as we would like to see and valuable training positions are going unfilled. The vulnerable members of society whom we serve require increased advocacy efforts.

This list could go on, but the challenges are clear. Amidst many competing interests we need to clearly articulate our "niche" and spread the message regarding the services that we are most uniquely qualified to provide. We need to be involved in the key discussions locally, regionally and nationally that will determine our future. In this edition of Behavioral Developments you will read of the many initiatives in process in committees and special interest groups and the opportunities that are available for you to sign on and help us forge a vibrant future for our field.

In early February, we held a strategic planning meeting. You received a survey soliciting your input as we prepared for this important event and I hope you took the opportunity to share your vision for SDBP. Associations around the country are taking a critical look at their operations and determining where to focus their resources. We recognize the time constraints and pressures faced by all our professionals and will be mapping out a strategy to most efficiently support you in your day to day practice and academic pursuits.

A key area of change is in methods of communication. Us "more experienced" members of the Society look to our younger partners to lead us into the world of technology and social media. We already have exciting new developments under way. With this newsletter we are launching the SDBP Discussion Board. Those of you who enjoy the information shared on listservs but shudder at the number of emails in your inbox will welcome this innovative approach to sharing information and experience in key topic areas. These include ADHD, Autism, Nurse Practitioners and Practice Issues as well as the opportunity to review, and add to discussion around Marty Stein's Challenging Cases. The discussion strands are readily accessible and arranged sequentially and you will be able to elect to receive regular email summaries, or to access the discussions at your own choosing. The newsletter is now available electronically and the website is becoming an ever richer source of information. I strongly encourage you to regularly visit this virtual home of SDBP and extend thanks to Damon Korb, Beth Wildman, and the members of the Communications Committee and to Amy Schull at Degnon and Associates for their great work in this regard.

The other committees have also been hard at work, as reported elsewhere in the newsletter. For those of us striving to stay afloat in practice, the Practice Issues Committee is working to keep moving us ahead on key fronts, including looming requirements for Meaningful Use of clinical data and appropriate benchmarks of care. The Society is also strengthening ties with the American Board of Pediatrics (ABP) in the area of quality improvement and the requirements for Maintenance of Certification (MOC). We have had the opportunity to nominate representatives to work on the revised version of the ADHD Performance Improvement Module (PIM) offered by ABP that will have both generalist and subspecialist tracks. This, and other PIMs that are in the development process, will afford an opportunity for physician members to both meet their MOC requirements and to effect relevant quality improvements in their practices.

Lynn Wegner and the newly formed Coding Committee have quickly had their work cut out for them in responding to recent proposed threats to reimbursement codes such as CPT 96110. We welcome the participation of members in these activities that require rapid mobilization of responses. Our Membership Committee is addressing a concern I noted earlier, that is, the workforce pipeline. The practical challenges to sustainable practice could be a strongly negative influence on career track decisions of young students if we do not act vigorously to get the word out about what a rewarding and fulfilling vocation it is to nurture and share in the developmental and behavioral progression of our patients. We look to our growing Trainee/Recent Graduates Committee to steer us to those topics that are most relevant to those considering, or just entering our field.

Space precludes description of all the activities of our other key committees but I do want to mention the growth of the Special Interest Groups (SIGs) that provide a forum for information sharing and support in focused areas. The interdisciplinary and international foundation of SDBP is most obviously represented in the newly approved International Developmental-Behavioral Pediatrics SIG and the rapidly growing Nurse Practitioner SIG. The Early Childhood SIG has just received Board approval and the existing ADHD and Autism SIGs are thriving.

So, there is much energy and activity within SDBP. I urge you to renew your sense of

ownership as we work together in this new world of challenges and opportunities. You will have noticed an opportunity in your membership renewal notice to show your financial support in our 30th Year campaign. We promise to use your time and talents efficiently if you sign up for work on one of our committees or join a SIG. I was teased for stressing in my incoming presidential address that we should not forget to “have fun”, but we really do need to remember why we are doing this in the first place. We are privileged to enjoy the wonderful interactions with our patients and their families, and our great colleagues. Best wishes to all.

Welcome to SDBP

The Society for Developmental and Behavioral Pediatrics (SDBP) is an international organization dedicated to improving the health of infants, children, and adolescents by promoting research, teaching and clinical practice in developmental and behavioral pediatrics. Comprised of more than 700 members, the society strives to promote an understanding of the social, educational, and cultural influences on children.

Behavioral Developments: Now Digital!

We hope that you enjoy our new digital newsletter. You can read it on line - on your desktop, laptop, Smartphone, iPad - or print it and enjoy reading a paper copy. You'll find *Behavioral Developments* in your inbox 4 times a year - twice as often as the old print version. We'll have more space to publish announcements and share information about members. In addition, you'll get the information sooner, instead of waiting 6 months.

Please let us know what you think about our new digital newsletter. If you have trouble with the digital newsletter and want a print copy, tell [Amy Schull](#) and she can send you a print copy. The Communications Committee is very excited about going digital in 2012 with the newsletter and [discussion board](#). Now, we need members to make these developments a success. Please read and post on the discussion board regularly and often and let us know about your successes, moves, publications, and interesting programs so we can publish them in the newsletter. - Beth Wildman and Robert Needlman (co-editors)

New SDBP Discussion Board

"Like email, with benefits"

The SDBP Discussion Board is a new, powerful tool to multiply our collective knowledge within the Society. Using the Discussion Board is simple - as easy as sending an email, but it has many more benefits. Here are a few important features:

- **Weekly Digest:** First, you have control over how many emails you get from the Discussion Board. The Weekly Digest feature sends you weekly updates of new postings on any topic you subscribe to (e.g., Nurse Practitioners, ADHD). Posts from that topic will be sent to your email box once per week. From that email, you can click on any posts that interest you and you will automatically be re-directed to the Discussion Board where you can read more about that subject and add to it, if you choose.
- **Archived Discussions:** Second, all posts are categorized and archived, so that you will be able to search for past discussions by entering a key word.
- **Challenging Cases:** Third, Martin Stein and the Journal of Developmental and Behavioral Pediatrics, has allowed us to link to Dr. Stein's case studies, a terrific educational resource!

Get "On Board"

You can access the Discussion Board through the members only section of the www.sdbp.org website or through the following link <http://www.sdbp.org/discussboard/discussboard.cfm>. It's easy. Try it!

Posting a message:

- Click on the appropriate topic
- Select "Post a New Thread."

Journal News

Suzanne Dixon, MD, MPH, Editor
Mary F Sharkey, B, Managing Editor

The *Journal of Developmental and Behavioral Pediatrics* is looking forward to another great new year. As a new benefit, all SDBP members are automatically registered on web site. We hope that you'll log in frequently, contribute to the Challenging Case blog, enjoy and comment on the children's drawings, and respond to the utterly unscientific polls. All these activities help us to grow as a scholarly community. So make a new year's resolution to start off each day (OK, each week) with a visit to JDBP.org. You can also read the *Journal* on your iPad or other portable device.

The lineup of original articles, reviews, and special articles for 2012 promises to be spectacular. Our submission numbers continue to grow and we will have more pages than ever to work with. In 2012, as in 2011, the publisher will send out surveys asking you to let us know what you want to see in the *Journal*. Please be sure to respond!

More progress: The electronic conflict of interest forms are more user-friendly; the *Journal* has a new production editor; and more press releases are getting out on specific articles with the help of the Lippincott, Williams and Wilkins marketing department.

As always, the *Journal* relies on strong and responsive reviewers. Some of the best reviews come from trainees. Reviewing is a valuable learning experience, whether the manuscript is strong or weak. We encourage senior SDBP members to make reviewing a regular part of the professional growth of the more junior members of our community.

Trainees and Recent Grads: Put Yourself in the *Spotlight*

SDBP is proud to announce the beginning of a newsletter feature showcasing the research and clinical endeavors of our trainees and recent graduate members. This is a great opportunity for younger members to promote their work and share their perspectives. *Spotlight* doesn't aim to describe specific projects but rather to serve as a platform to share experiences and conceptualizations: How do your interests fit into what's known now? What are your goals, and how will you achieve them? What extraordinary clinical encounters have shaped your interests?

Spotlight submissions should be from members in training or who have graduated within the last few years. Please contact Nicole Wightman, MA at nwightm1@kent.edu

Awards

SDBP Research Grant

Deadline Extended to April 28, 2015.

The Society for Developmental and Behavioral Pediatrics is very excited about the SDBP 2015 Research Grant. Again this year, SDBP will be awarding \$10,000 to one young investigator in the field of developmental and behavioral pediatrics! This is an incredible opportunity for one individual looking to obtain financial support of their research, and just one way SDBP continues to fulfill its mission of encouraging research and promoting education within the field.

To be eligible for the SDBP Research Grant, the applicant must be an SDBP member, must not have any prior extramural funding as a principal investigator, and must be NEW Investigators, defined as: 1) faculty members who are no more than five years out from completion of all training (fellowship or post-doc); 2) clinical fellows (developmental-behavioral pediatrics and related fields); 3) post-doctoral fellows (psychology and related fields); or 4) senior residents already accepted to DBP fellowship programs (Note: other residents are NOT eligible)

The recipient of the 2015 SDBP Research Grant will be recognized at the Annual Meeting in October, and awarded a grant in the amount of \$10,000 for one year.

All completed applications for the initial submissions, which include the SDBP Research Grant Award Application Form, Proposal Form, letters of support, and biographical sketches, must be submitted by April 21, 2015. NOTE: Deadline extended to April 28, 2015. Applications will not be processed if any items are missing.

The 2015 SDBP Research Grant would not be possible without your financial support. Thank you for your generous contributions, and helping to make the dreams of one young investigator come true. If you would like more information about contributing to SDBP or one of SDBP valuable programs, contact the SDBP National Office at (703) 556-9222, or email info@sdbp.org.

Special Recognition Award

The Special Recognition Award is an advocacy and service award that has been given at the annual SDBP meeting for over a decade. This award provides an opportunity to recognize individuals or organizations whose work aligns with the overall mission and goals of the SDBP in promoting the developmental and behavioral health and well-being of children and families.

[Become an SDBP Affiliate Org](#)

[SDBP SIG Guidelines](#)

[Membership Brochure!](#)

Previous awardees have been selected from the region around the annual meeting site and presented to individuals and/or organizations during the annual meeting. The intent of this solicitation process was to help promote the visibility of the SDBP annual meeting in the city and surrounding region, minimize any costs associated with presenting the award in person, and give meeting attendees the opportunity to hear about some of the awardees work. This process has restricted the potential nominee pool to cities and the more northern half of the country and virtually eliminated international nominations. Additionally, finding time in the packed annual meeting to present the award in a way that is respectful of the awardees and the SDBP attendees has become difficult at best. For these reasons the selection criteria, process, and awarding of the SDBP Special Recognition Award has been revised as below.

Selection Criteria

The Special Recognition Award recognizes individuals and/or organizations that have made significant contributions to the field of developmental and behavioral pediatrics and whose work is consistent with the SDBP mission statement. Award criteria include but are not limited to those whose professional or organizational involvement has:

- » Produced major public benefits in the field of child development and behavior including legislative policy and law or government service
- » Led to actions to change the patterns of delivery and access to developmental and behavioral services for children
- » Led to reimbursement changes that contribute to the field of developmental and behavioral pediatrics
- » Made significant contributions to special populations of children in the areas of development and behavior
- » A documented positive influence on teaching/training in the field of developmental and behavioral

Process

The Special Recognition Award may be presented at any time of the year, but no more than one will be awarded annually. Nominations may be made to the Advocacy Committee at any time by SDBP membership with nominators providing:

1. A narrative statement on the individuals and/or organizations' contributions and work as related to the Selection Criteria.
2. A brief resume (individual) or organizational description.
3. Endorsements from other individuals or groups (encouraged).

Three members of the Advocacy Committee including the Chair will review the nominations, seek additional information from nominators and others as deemed needed, and prioritize a list of at least two and no more than four nominees. This list of nominees will be presented to the Presidents' Committee (consisting of current, past, and elect presidents) for final selection.

Awarding

The awardees will be notified by the Advocacy Chair by phone and a letter signed by both the SDBP President and AC Chair. An announcement of the award will be placed in the SDBP Newsletter accompanied by a description of the awardees' work.

I would encourage everyone to think about some individuals and/or organizations that deserve the Special Recognition Award and submit nominations.

Job Bank

By placing an ad on the website, you will have access to a field of professionals in Developmental and Behavioral pediatrics. In addition to your job being posted, your ad will also be included in SDBP's e-newsletter that is sent out to our more than 800 members. Submitting an ad is simpler than ever, using our automated submission program. SDBP will only accept placement ads from institutions/organizations that are seeking to fill positions within the developmental and behavioral pediatric community. Online posts will expire after 3 months unless notified.

Classified Ads

If you would like to submit an ad, please [Click Here](#). Artwork and company logos will not be accepted.

Advertising will be billed at a rate of \$10.00 per line, based on final layout. A sample layout and preliminary invoice will be sent to the advertiser prior to publication. All ads are posted upon receipt of payment.

MultiCare Mary Bridge Developmental Behavioral Pediatrics is seeking a physician to join an established provider group devoted to evaluation and treatment of developmental and behavioral differences in our pediatric patient community. The position is full-time, based in Tacoma, WA and may include time spent seeing patients at satellite clinics. As a MultiCare physician you have access to a comprehensive network of specialists, resources and a system-wide EMR to compliment the treatment plan for your patients.

Competitive salary, a full array of benefits, a healthy work/life balance, and a great location makes this an ideal choice for the provider who is looking to experience the best of Northwest living: from big-city amenities to the pristine beauty and recreational opportunities of the great outdoors.

Requirements:

- Board certified/eligible in DBP at time of employment
- Licensed in the state of WA by the time of employment
- DEA, NPI & prescriptive authority
- Current BLS for Healthcare Providers certification by the American Heart Association

MultiCare:

Physicians affiliated with MultiCare are recognized as being among the best healthcare providers in the Northwest Region with both adult and pediatric specialists providing easy access for patient consultations right here in the community. You'll find everything you need to excel in your job including outstanding facilities, comprehensive resources and talented teammates sharing your commitment to quality patient care. MultiCare is a recognized leader in the use of advanced technology and EPIC, our Electronic Medical Record (EMR), keeps our staff better connected throughout the healthcare system. Whether you choose to affiliate with MultiCare through an employed position with one of our hospitals, clinics, a community practice or other contractual relationship our administrative team is here to partner with you to provide a high value system of health care.

Washington
Washington State
Providence Health & Services
Posted: (9/24/2015)

Description:

Eastern Washington State – Providence Medical Group and affiliate Kadlec have immediate openings for excellent BE/BC Developmental/Behavioral Pediatricians to join our teams in Spokane and Tri-Cities. Join an advanced pediatric care team located at Providence Sacred Heart Children's Hospital in beautiful Spokane, where you will conduct multidisciplinary developmental pediatric assessments, management and consultations. Or, join our dynamic team in the Tri-Cities area of SE Washington where you will develop a comprehensive program to evaluate, diagnose and treat problems, underachievement and learning difficulties, attention-deficit/hyperactivity disorder, anxiety disorders, autism and more. Excellent compensation and benefits for these full-time positions practicing on the sunny side of the Evergreen State.

Spokane, Eastern Washington's largest city, is located about halfway between the Rocky and Cascade Mountain Ranges. Spokane's affordable housing, growing arts and theater community and excellent higher education choices make it a prime destination for families and working professionals alike.

Tri-Cities (Kennewick, Pasco and Richland) enjoys an abundance of outdoor recreation, excellent education, and rich scientific and agricultural industries – including an internationally recognized wine industry. The Gallup Well-Being Index included the area on their list of "Happiest & Healthiest Cities in America."

Considerations:

Providence Medical Group - Eastern Washington is our physician-led network of more than 500 primary and specialty care providers in multiple clinic locations in Spokane and Stevens counties.

Kadlec Clinic is part of Kadlec Regional Medical Center's growing network of clinics offering primary care and specialist services with exceptional, patient-focused care in southeast Washington and northeast Oregon.

Providence Medical Group is part of, and Kadlec is affiliated with, Providence Health & Services, which operates 28 exceptional not-for-profit hospitals and more than 350 clinics across Alaska, California, Montana, Oregon and Washington. With hundreds of physician and advanced practice provider opportunities in virtually all specialties, Kadlec and Providence offer diverse locations, lifestyles and practice models. Learn more at www.providence.org/providerjobs.

Position: Pediatric Developmental / Behavioral Specialist
Jobs in Portland, OR
Portland
Providence Health & Services
Posted: (9/24/2015)

Description:

Portland, Oregon -- Providence Child Center is seeking a Pediatric Developmental/Behavioral specialist to join our integrated, multidisciplinary team. This full-time position will see patients at Children's Developmental Health center in the Providence Child Center and at Providence St. Vincent Medical Center. Competitive compensation and great benefits package in the scenic beauty of the Pacific Northwest.

Practice in beautiful Portland, a metro of over two million with strong local neighborhoods and a close connection to nature. Portland has been named the most bicycle- and dog-friendly big city in the nation and has a high "livability" score.

Considerations:

Providence Children's Health provides a rich continuum of services for children. The Providence Child Center, on the Providence Portland campus, is home to the Center for Medically Fragile Children, Providence Neurodevelopmental Center for Children, and the Swindells Resource Center. Providence St. Vincent Medical Center offers Pediatric Primary Care, Pediatric Acute Care, Pediatric Specialty Care, and the Westside Providence Neurodevelopmental Center for Children.

Providence Health & Services is a not-for-profit system of hospitals, clinics and provider partners in Alaska, California, Montana, Oregon and Washington. Providence has been providing high-quality, compassionate care in the West for more than 150 years, and we continue to grow with the communities we serve. www.providence.org/providerjobs

Position: Developmental/Behavioral Pediatric Jobs in
Anchorage, AK
Anchorage, Alaska
Providence Health & Services
Posted: (9/24/2015)

Description:

Anchorage, Alaska -- Outstanding opportunity for

Developmental/Behavioral Pediatric physician in the Last Frontier! Join The Children's Hospital at Providence (TCHAP), the state's only dedicated pediatric hospital, as we build a statewide program. Responsibilities include conducting multidisciplinary developmental pediatric assessments, management and consultations. Our highly qualified team works to evaluate, diagnose and treat a range of conditions including ADHD, autism and developmental delays. You will enjoy broad pediatric subspecialty support, excellent compensation (salary plus productivity bonus) and generous Providence benefits, including generous relocation assistance.

Alaska offers financial, cultural and recreational opportunities beyond compare. There is no state income or sales tax; in fact the state pays every Alaskan a yearly dividend from oil revenues! The combination of urban and wild is what makes Anchorage such a special place. Where else can you catch a salmon in the shadow of skyscrapers, or meet a moose on your way to the symphony?

Considerations:

The Children's Hospital at Providence (TCHAP), part of Providence Alaska Medical Center, is the only comprehensive Children's Hospital in Alaska, with a 9-bed PICU, 20-bed Med/Surg unit, and 47-bed NICU. There are more than 2,000 Pediatric/PICU admissions and 2,500 deliveries per year.

Providence Health & Services is a not-for-profit system of hospitals, clinics and provider partners in Alaska, California, Montana, Oregon and Washington. Providence has been providing high-quality, compassionate care in the West for more than 150 years, and we continue to grow with the communities we serve. www.providence.org/providerjobs

Position: Division Chief, Developmental and Behavioral Pediatrics
Columbus, Ohio
Nationwide Children's Hospital
Posted: (9/14/2015)

Description:

The Division of Developmental and Behavioral Pediatrics at Nationwide Children's Hospital and the Department of Pediatrics at The Ohio State University College of Medicine seek a talented physician leader to serve as Division Director.

The successful candidate will lead a faculty of eight physicians, four nurse practitioners, and four administrative assistants. Specialty programs include a Child Development Center; a Center for Autism Spectrum

Disorders with intensive behavioral intervention; and ADHD, Down syndrome, Williams syndrome, spina bifida and early childhood mental health programs. The Child Development Center has a multidisciplinary staff including psychology, speech & language pathology, social work, and genetic counseling. There were nearly 14,000 outpatient visits in 2014.

Qualifications include board certification in developmental-behavioral pediatrics with experience in clinical, basic or translational research; experience in quality and safety initiatives; a distinguished record of accomplishment as a clinician and academician; a proven record of leadership and managerial responsibilities; and experience in mentorship of junior faculty. Academic rank will be at the Associate or Full Professor level. Collegiality and excellence in clinical service, academics and teaching of students, residents, fellows and referring physicians are essential characteristics of the Division's next leader.

An active, ACGME accredited fellowship program in developmental-behavioral pediatrics is an integral component of the Division of Developmental and Behavioral Pediatrics, as well as an active Leadership Education in Neurodevelopmental Disabilities (LEND) Program. The Child Development Center is also home to internships and post-doctoral fellowships in intellectual disabilities psychology.

The division is involved in clinical research, including NIMH funded pediatric pharmacology studies, behavioral health services research, and numerous clinical trials related to ADHD, autism, depression, and anxiety.

Ranked seventh of only 10 children's hospitals on *U.S. News & World Report's* 2014-15 "America's Best Children's Hospitals Honor Roll," Nationwide Children's Hospital is one of the nation's largest not-for-profit freestanding pediatric healthcare networks providing wellness, preventive, diagnostic, treatment and rehabilitative care for infants, children and adolescents, as well as adult patients with congenital disease. Nationwide Children's, also ranked among the Top 10 on *Parents* magazine's 2013 "Best Children's Hospitals" list, has a medical staff of 1,100 and nearly 10,000 employees providing state-of-the-art pediatric care for one million patient visits annually.

The Research Institute is ranked seventh nationally in NIH funding to free-standing children's hospitals. Research programs are organized into 12 multidisciplinary Centers of Emphasis structured to encourage collaboration, facilitate team science and foster creativity.

Contact:

Inquiries and nominations are encouraged. Please contact Annelle Anderson, Physician Recruiter (614) 355-4163 or submit your CV via email: Annelle.Anderson@nationwidechildrens.org

All inquiries and referrals are confidential.

Position: Developmental-Behavioral Pediatrician
Oakland, California
UCSF Benioff Children's Hospitals - Oakland & San
Francisco
Posted: (8/21/2015)

Description:

The UCSF Benioff Children's Hospital Oakland Division of Mental Health and Child Development (DMHCD) in conjunction with the UCSF Division of Developmental Medicine, are recruiting a full time BD/BC developmental-behavioral pediatrician. This position will involve the assessment and management of children with a wide range of neurodevelopmental & behavioral disorders. We are seeking a passionate d-b ped whose values and clinical practice supports our mission to advance the health and well-being of children through clinical care, teaching, and research, as well as the elimination of healthcare disparities for children and adolescents with developmental and behavioral disorders. The candidate should have experience in working effectively with other disciplines, and with schools and community agencies. Children's Hospital is a major training center in Northern California, and this position will include the teaching of pediatric residents on d-b rotation.

The DMHCD at Children's Hospital Oakland includes Child and Adolescent Psychiatry, Early Intervention Services, high school-based clinics, and other programs within the hospital and community. Close relationships exist with the Neonatal Followup Program, as well as with the Divisions of Ambulatory Pediatrics, Adolescent Medicine, Neurology, Rehabilitation, and Genetics. Since January 2014 the Children's Hospital in Oakland and the University of California San Francisco Children's Hospital were formally affiliated. Opportunities for joint practice, programs and projects in Developmental & Behavioral Pediatrics between the two Hospitals could shape the appointed pediatrician's job description, as desired.

Position: Division Chief of Child Development
Peoria, IL
University of Illinois College of Medicine at
Peoria/Children's Hospital of Illinois
Posted: (8/12/2015)

Description:

The Department of Pediatrics at the University of Illinois College of Medicine at Peoria (UICOMP), along with its partners at Children's Hospital of Illinois (CHOI) and Easter Seals of Central Illinois, have initiated a national search to find an entrepreneurial leader as the Division Chief of Child Development in order to enhance and grow an important clinical program.

The new Division Chief will be responsible for the comprehensive operations of the division so that, as a whole, the division supports the mission of UICOMP, CHOI, and Easter Seals, including education, clinical

services, research and other scholarly activity, and advocacy. The Division Chief will be provided with the resources to recruit additional faculty members to the division with a goal of three clinical faculty. The leadership team is open to considering senior leaders as well as program directors and other mid-career faculty seeking their initial division chief opportunity. Leadership development, mentoring and operational support resources are available for the selected candidate.

Developmental-Behavioral Pediatrician positions require candidates who are BC/BE in pediatrics and have completed fellowship training in neuro-developmental disabilities or development-behavioral pediatrics. These pediatricians support the continued development of five comprehensive service lines within the division of Child Development: cerebral palsy; in-patient consult service; general development; autism and ADHD. Candidates with scholarly and research interests are highly desirable, along with experience in teaching medical students and residents. The compensation and academic rank will be competitive and commensurate with experience.

The University of Illinois College of Medicine at Peoria is an Equal Opportunity, Affirmative Action employer. Minorities, women, veterans and individuals with disabilities are encouraged to apply.

Considerations:

The University of Illinois College of Medicine at Peoria is one of the regional campuses that make up the nation's largest public medical school. The Peoria campus is known among students for its strong academic setting, demonstrated in small class sizes, rigorous curriculum, hands-on clerkships, numerous residency programs, large referral base and exceptional facilities; and by physicians seeking the ideal combination of teaching and practicing medicine in a research-based university setting.

UICOMP's main clinical partner is the Children's Hospital of Illinois, a 136-bed, full-service hospital, with more than 115 pediatric specialists in 40+ subspecialties, opened a new state-of-the-art inpatient bed tower in 2010. CHOI has the largest and only Level IV NICU outside of Chicago, and carries designations as both a Level I Pediatric Trauma Center and a Pediatric Critical Care Center. Located on the campus of OSF St. Francis Medical Center, it's the pediatric teaching affiliate of UICOMP, the state's only major pediatric teaching hospital outside Chicago. The hospital is also proud to house the St. Jude Midwest Affiliate, which brings some of the care and services offered by St. Jude in Memphis to central Illinois.

Easter Seals of Central Illinois is the largest single provider of early intervention services in downstate Illinois. Other services offered in collaboration with UICOMP and CHOI include developmental therapy, autism spectrum disorder services, and a full range of therapy services (PT, OT, speech, feeding). Easter Seals is also the home of the Ray & Kathy LaHood Center for Cerebral Palsy, which provides a full range of diagnostic and treatment services for children with cerebral palsy and their families.

Contact:

Inquiries should be directed to Jennifer Schaulin at (972) 768-5350 or via e-mail at jennifers@millicansolutions.com.

Position: Assistant Professor In-Residence
Irvine
University of California Irvine
Posted: (8/10/2015)

Description:

The University of California, Irvine, Department of Pediatrics is recruiting a Translational Research Scholar in the area of Development, Health, and Disease Research. The successful candidate will be an outstanding researcher in related aspects of how socio-cultural conditions during pregnancy and early life affect health across generations. The candidate should be able to synthesize information from molecular, clinical, epidemiological and anthropological research towards understanding the evolutionary context of human health and disease, family and societal structure, and addressing global health challenges. This is an academic senate appointment expected to be at the Assistant Professor level. Salary will be commensurate with training and experience. UC Irvine, located in Orange County, with a population of more than three million, has a long and distinguished tradition of excellence in neuroscience.

Considerations:

Requirements - We invite applicants who currently hold an academic position as Post-doctoral Fellow or Faculty Member of a major institution. Successful candidates must have a PhD or an MD with research experience in evolutionary medicine approaches to studying chronic disease etiology and epidemiology, and early life origins of health and disease. The candidate should have a record of high-quality mentored or independent research, with scholarly activity and publications commensurate with experience. Candidates who demonstrate the ability to be competitive for extramural funding (e.g., current funding or submitted applications for mentored or independent awards, particularly from the NIH) are especially sought. It is expected that the successful candidate will develop an extramurally funded research program at a high level of accomplishment, leading to national and international recognition.

Contact:

For further information and correspondence, please contact Lisa Ross Erickson at lmross@uci.edu

TO APPLY: Please log onto UC Irvine's RECRUIT located at <https://recruit.ap.uci.edu/apply/JPF02969>. Applicants should complete an online application profile and upload the following application materials electronically to be considered for the position:

1. Cover letter
2. Curriculum vitae
3. A description of current research and future plans
4. Names of at least five referees

A separate statement that addresses past and/or potential contributions to diversity, equity and inclusion should also be included in the application materials.

The University of California, Irvine is an Equal Opportunity/Affirmative Action Employer advancing inclusive excellence. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, age, protected veteran status, or other protected categories covered by the UC nondiscrimination policy.

Position: Developmental-behavioral Pediatrician
2500 Red Hill Ave. Suite 100 Santa Ana, CA 92705
University of California Irvine - The Center for
Autism & Neurodevelopmental Disorders
Posted: (8/3/2015)

Description: Innovative Opportunity with UC Irvine & CHOC Children's at The Center for Autism & Neurodevelopmental Disorders

The Center for Autism & Neurodevelopmental Disorders seeks pediatric medical specialists with interest and expertise in caring for children with autism spectrum disorders, ADHD and other developmental disorders.

The Center is looking for board certified or eligible developmental-behavioral pediatricians, pediatric neurologists or neurodevelopmental

pediatricians who want to join our team, work in a multidisciplinary environment and make a difference in the lives of children and families.

Since its opening in 2001, the Center has been a leader in medical assessment, diagnosis, care coordination, family support and education for children with autism and other developmental disorders focusing on children birth through age 5 years. With a recent increase in funding, and a collaborative effort of UC Irvine, CHOC Children's and Chapman University, The Center has expanded to offer a multidisciplinary team of specialists for evaluation, diagnosis and treatment serving children, adolescents and young adults from birth to age 22 years.

We are seeking qualified individuals with a strong commitment to patient care, education, research, and community engagement. The faculty member will provide direct patient care; be involved in teaching and community outreach, and be encouraged to participate in clinical research.

Considerations:

The Center for is located in Orange County, California, which is known for its 42 miles of coastline with such spectacular vistas that many proclaim it the 'California Riviera'. Boasting one of the best climates in the world, with sunshine 342 days per year and an average annual temperature of 70 degrees Fahrenheit, Orange County is known for some of the most diverse landscape imaginable and just an hour's drive from both desert and mountains. Orange County also boasts of such world class attractions as Disneyland and Disney California Adventures, Knott's Berry Farm, Mission San Juan Capistrano, Laguna Beach Pageant of the Masters, and some of the best shopping and dining in all of Southern California.

Contact:

We would appreciate the opportunity to discuss this position with you and share in greater detail why we feel it to be among the top positions available nationally. Please contact The Center's Medical Director, Joseph Donnelly, at (949) 267-0453 or via email at: donnelly@uci.edu for more information. Interested applicants should submit a cover letter and CV. All inquiries will remain confidential without your prior approval.

The University of California, Irvine is an equal opportunity employer committed to excellence through diversity.

Position: Developmental Behavioral Pediatrician
Bedford, MA
Patriot Pediatrics
Posted: (7/28/2015)

Description:

Patriot Pediatrics is a suburban practice located in Bedford, MA, one half hour from Boston.

We are affiliated with Boston teaching hospitals, and our physicians have academic appointments at Harvard Medical School. We currently have availability for a 0.2-1 FTE BC/BE developmental/behavioral pediatrician. The ideal candidate will be experienced with common developmental/behavioral pediatrics issues including sleep, toileting,

autism spectrum disorders and educational issues, and will be able to work closely with families, teachers and other health professionals to support the optimal development of children.

Our practice is comprised of three full-time pediatricians, a part-time developmental pediatrician and several part-time pediatric nurse practitioners. The position is flexible, with the candidate working from two to six sessions per week. There is weekend and holiday call (approximately one in every eight weekends and one or two holidays per year), with second call for phone triage one night per week (first call is a night-time nurse telephone triage service). The weekday sessions consist mostly of patient care with typical developmental/behavioral issues, plus some general pediatrics. The weekends or holidays consist of three to five hours of acute, same-day visits on Saturday and Sundays. Salary and benefits are competitive. The candidate will receive an academic appointment in pediatrics at Harvard Medical School commensurate with experience and accomplishments.

We have a terrific patient population, and a wonderful support staff with medical assistants, nurses, triage nurses and administrative staff. Developmental pediatrics is an expanding part of our practice and we are excited to enhance our capacity in this area.

Position: Division Director, Developmental and Behavioral Pediatrics
Iowa City, IA
University of Iowa Carver College of Medicine
Posted: (7/28/2015)

Description:

The Stead Family Department of Pediatrics at the University of Iowa Carver College of Medicine is seeking a Director for the Division of Developmental and Behavioral Pediatrics at the rank of Associate Professor or Professor on the tenure or clinical track. The Director will lead the division's clinical, research and teaching services and will serve as the academic leader for the Center for Disabilities and Development, the State of Iowa's Center for Excellence on Disabilities. The Director will benefit from significant institutional resources, including the University of Iowa Institute for Clinical and Translational Science which houses the University's CTSA program. There are numerous opportunities to build an interdisciplinary research program through collaborations with faculty in Public Health, Pharmacy, Nursing, and other departments in the Carver College of Medicine.

Requirements:

Must Hold MD, DO or equivalent

Board eligible/Certified in Pediatrics and/or Developmental and Behavioral Pediatrics or equivalent training

A record of innovative and effective administrative and fiscal leadership experience

Demonstrated commitment to diversity in the work place as evidenced through teaching, scholarly activity, or past job experience

Desirable qualifications:

5 or more years of experience in an academic health system

Demonstrated history of externally funded scholarly activity

Considerations:

The University of Iowa Carver College of Medicine is one of the top biomedical research institutions in the nation and ranked 41st overall and 20th among public medical schools for NIH funding in FY14. The U.S. News and World Report research ranking places the College 11th among public institutions, and the Stead Family Department of Pediatrics ranked 24th overall and 13th in NIH funding among all public pediatric departments nationwide in FY14. The facilities for patient-care, education, and research are outstanding.

The Stead Family Department of Pediatrics comprises the medical and research staff of UI Children's Hospital. The University of Iowa Children's Hospital is one of the nation's top-ranked pediatric care and research institutions. It is the only university-affiliated hospital in Iowa devoted solely to the care of infants, children, adolescents and young adults, and is Iowa's only accredited Level 1 Regional Resource Pediatric Trauma Center. In 2015-2016, UI Children's Hospital ranked in nine children's specialties in U.S. News and World Report, including cancer, cardiology/heart surgery, diabetes/endocrinology, neonatology, nephrology, neurology/neurosurgery, orthopaedics, pulmonology, and urology. A new 189-bed children's hospital is scheduled to open in 2016.

Position: Developmental Pediatrician Faculty Role at the University of Arizona in Tucson
Tucson, Arizona
University of Arizona
Posted: (7/28/2015)

Description:

Banner Health and The University of Arizona Department of Pediatrics are seeking a Developmental & Behavioral Pediatrician to join Dr. Sydney Rice and Dr. Margaret Trouard at Diamond Children's Hospital in Tucson.

This is an opportunity for a dynamic physician educator to join an established Division for a primarily outpatient, academic role. Spanish skills are a plus.

Tucson (population 1+ million), in southern Arizona, is a mecca for world-class hiking, biking, golfing and more. In the summer months, residents enjoy first-rate spas and resorts, dining out, museums, theaters and the 35 art galleries in its downtown. Tucson boasts 350 sunny days per year with warm winters and hot, low-humidity summers.

The University of Arizona is an equal opportunity, affirmative action organization. The University prohibits discrimination on the basis of race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity and is committed to maintaining a diverse and inclusive work environment.

Position: Developmental Pediatricians
Dallas, TX and Pensacola, FL
Pediatrix Medical Group
Posted: (6/23/2015)

Description:

Pediatrix Medical Group is seeking BC/BE Developmental Pediatricians for our practices in Pensacola, FL and Dallas, TX.

Pensacola, FL

- Direct a new service for developmental support for NICU graduates. In collaboration with Sacred Heart Children's Hospital,

provide evaluations and treatment for a wide range of disorders including early childhood developmental delays, autism and genetic syndromes

- Potential for academic appointment through Florida State University
- Opportunity to personally shape the developmental program as you see fit

Located in the Florida panhandle, the coastal town of Pensacola boasts an unparalleled quality of life complemented by diverse and friendly neighborhoods, warm and beautiful weather, unmatched beaches and a community driven towards success. With 343 days of sunshine a year and 56 miles of unspoiled coastline, the area affords plenty of opportunities to relish the great outdoors all year long. The cost of living is affordable and there is no state income tax.

Dallas, TX

- Pediatrician will need to be BC/BE in one of the following subspecialties: neurodevelopment, developmental behavioral, neurology, psychiatry or neonatology with experience in seeing older children. General pediatricians with a minimum of 5 years' experience and demonstrated interest in developmental pediatrics are also invited to apply.
- Practice provides inpatient developmental consultation for high-risk infants. Infants are then followed after discharge in an outpatient setting to identify developmental needs and promote optimum development over time.

Dallas is the fourth largest metropolitan area in the United States. This modern city offers residents and visitors alike a chic mystique, great quality of life, affordable housing, a growing economy, vibrant arts and culture and diverse communities for everyone to enjoy. Excellent schools; 54 schools in the Dallas-Fort Worth region were featured in U.S. News and World Report's 2014 America's Best High Schools. There is no state income tax.

We offer competitive salary and excellent benefits.

Enjoy the stability of an organization with more than 35 years of healthcare industry experience. Pediatrix is an Equal Opportunity Employer.

Contact:

To apply for either of these positions or learn more about our benefits and our national group practice, visit www.pediatrix.com/clinicalcareers or contact Francine Messina at 800.243.3839, ext. 5635.

Position: Developmental Pediatrician
Las Vegas, NV
Pediatrix Medical Group
Posted: (7/15/2015)

Description:

Exciting opportunity for a BC/BE Developmental Behavioral Pediatrician or Neurodevelopmental Disabilities Specialist to help build a new NICU

follow-up program. The practice focuses on neurodevelopmental follow-up of high-risk infants throughout the Las Vegas Valley. The practice provides inpatient developmental consultation for high-risk infants. Infants are then followed after discharge in an outpatient setting to identify developmental needs and promote optimum development over time. The position provides the opportunity to personally shape the practice. For those with an academic interest, there are also opportunities to support national research efforts through a collaborative of developmental practices across the country.

Long known as a major resort city with world-class entertainment, Las Vegas offers a multitude of opportunities to live, work and play in one of the most magnificent entertainment centers in the world. The splendor of the desert provides a breathtaking backdrop for the outdoor enthusiast to enjoy activities such as golfing, skiing, snowboarding and water sports. The recently opened Smith Center for the Performing Arts offers a wide array of world-class theater and musical productions. The area is home to 357 public schools along with over 40 large private schools; The University and Community College System of Nevada (UCCSN) is a leader in higher education. With a wide range of housing choices you will find the community that is perfect for you and your family -- from family-friendly neighborhoods, master-planned communities, high-rises, condominiums, golf communities, urban and suburban options -- there is something for everyone. The cost of living is affordable and there is no state income tax.

We offer competitive salaries and excellent benefits including:

- Health (choice of two PPO options), life, vision, dental and disability insurance
- 401(k)
- Annual CME allowance
- Potential for relocation assistance
- Employee stock purchase plan
- Stability in an organization with more than 35 years of healthcare industry experience
- Opportunities to participate alongside physicians in quality improvement initiatives
- Professional liability insurance and assistance with mandatory hospital credentialing and state licensing, and reimbursement of associated fees

Pediatrix Medical Group is an Equal Opportunity Employer

Contact:

To learn more about this opportunity or other Developmental Pediatric opportunities, please visit www.pediatrix.com/clinicalcareers or contact Lori Abolafia, Pediatrix Medical Group, 800.243.3839, ext. 5209.

Position: Medical Director
Phoenix, Arizona

Description:

UNIQUE PRACTICE OPPORTUNITY/LEAVE WINTER
BEHIND/GET OUT OF THE INSURANCE TRAP

I am currently in Private Practice in Phoenix, Arizona and I will be retiring in 1 year and looking for someone to replace me in a unique practice opportunity. I am employed at Southwest Human Development (SWHD), a premier Birth to Five Organization in Phoenix, Arizona. I perform as their Medical Director for their Children's Developmental Center where we do "transdisciplinary" evaluations for young children seeing kids with delayed development, R/O autism, feeding difficulties, ADHD, etc. We see families in a well equipped play room after a home visit. The team consists of myself, a psychologist, speech pathologist, occupational therapist, and as necessary a registered dietician. We do extended but not overly lengthy evaluations as we see each family as a team. There are always opportunities to expand this service which has been very well received by the community.

The other component of this unique opportunity is my private practice in D-B Pediatrics where I see patients (birth to 22 years) for all the usual kinds of things. I work with a full time bilingual Medical Assistant and up to half time PNP (who has worked with me for 22 years). We use CHADIS (www.chadis.com) to collect information prior to a family being seen. This system has worked well for me with modifications made over 25 years. There is clearly room to grow and modify and add clinical research opportunities.

I do not take insurance (though families can submit our bills for Out of Network benefits to their health insurance) and have developed an excellent reputation and get lots of referrals. The agency provides me with a beautiful large sunny office, and computer and phone, etc and since we don't do billing that is taken care of. I am happy to provide additional information to the interested and highly competent provider. While I am not "selling" this practice I am not "giving it away" either.

Considerations:

Southwest Human Development is the premier early childhood organization in Arizona and the Southwestern US. It has over 50 programs, employs over 800 employees and has a \$50 million budget. The agency is over 25 years old and my practice has been here for 4 years with tremendous opportunity for growth and innovation.

SDBP Research Grant

[Submit your Application](#)

The Society for Developmental and Behavioral Pediatrics is very excited about the SDBP 2012 Research Grant. Again this year, SDBP will be awarding \$10,000 to one young investigator in the field of developmental and behavioral pediatrics! This is an incredible opportunity for one individual looking to obtain financial support of their research, and just one way SDBP continues to fulfill its mission of encouraging research and promoting education within the field.

To be eligible for the SDBP Research Grant, the applicant must be an SDBP member, must not have any prior extramural funding as a principal investigator, and must be a trainee (defined as fellows in Developmental and Behavioral Pediatrics; Post-doctoral fellows in psychology/other PHD programs); in addition, eligibility has been extended to five years post-doctoral training or DBPed fellowship within the date of submission of the proposal.

The recipient of the 2012 SDBP Research Grant will be recognized at the Annual Meeting in September, and awarded a grant in the amount of \$10,000 for one year.

All completed applications for the initial submissions, which include the SDBP Research Grant Award Application Form, Proposal Form, letters of support, and biographical sketches, must be submitted by April 2, 2012. Applications will not be processed if any items are missing.

The 2012 SDBP Research Grant would not be possible without your financial support. Thank you for your generous contributions, and helping to make the dreams of one young investigator come true. If you would like more information about contributing to SDBP or one of SDBP valuable programs, contact the SDBP National Office at (703) 556-9222, or email info@sdbp.org.

Privacy Policy

Your privacy is important to the Society for Developmental and Behavioral Pediatrics (SDBP). Our current privacy practices are outlined below. We may modify this information periodically, so please check back for updates on our current policies regarding information gathering and dissemination.

Disclaimers: SDBP tries to ensure that all information on this website is accurate but does not guarantee that it is. This website contains scientific and educational information, but its contents do not constitute medical advice.

Members Only Section: To access areas designated as Members Only users must be current members of SDBP. SDBP members who wish to use the Members Only area of the website will be required to enter certain personal identification information to gain access. The personal information entered will not be used in any way other than to control access (see below).

Links: This website contains links to other Internet sites. SDBP is not responsible for the content or privacy practices of those sites. We encourage users to be aware of this when they leave this website and to read the privacy statements of the other sites they visit.

Surveys: SDBP, or third parties designated by SDBP, may request information from users via surveys. Survey information may be used by SDBP for business or scientific purposes.

Collection and Use of Information: "Personal Identifying Information" is your name, street address, e-mail address, telephone number, or any other information that might identify you individually. The SDBP does not collect this information from a user of this web site, except where you send it to SDBP voluntarily. On occasion, the SDBP will sell to third parties its members' names and mailing addresses (but not e-mail addresses, telephone numbers, or fax numbers) that it gathers from its members. Notwithstanding any of the above, we may release membership lists or personal identifying information already obtained if we determine that release is appropriate to comply with the law, to enforce or apply our contractual rights or obligations, to protect the rights, property, or safety of SDBP, our members, or others, or to establish a legal claim or defense.

"Non-personal Information", e.g., IP addresses or type of web browser you are using, may be collected to be used in aggregate to create statistics for the web site and the system administration. This analysis of traffic to the web site and pages visited permits us to design the web site to best suit our users' interests. We do not use non-personal information to identify you on an individual basis. We may place "cookies" on the computers of visitors; these cookies enable you to return to the web site and use its services without logging in and identifying yourself each time. We do not use cookies to track your activities other than those on our web site.
